Balaram B

Mysore, India — +91 9449114920 — ballubalaram2003@gmail.com — github.com/Maverick-B9 — linkedin.com/in/balaram-b

SUMMARY

A Computer Science student focused on building intelligent software systems that combine machine learning, backend engineering, and scalable web infrastructure. Experienced in developing AI-powered platforms, REST APIs, and real-world deployment using Linux-based environments, with hands-on work in model integration, data analysis, and production-ready applications.

EDUCATION

B.E. Computer Science Expected 2027
Maharaja Institute of Technology, Mysore
CGPA: **9.08 / 10**

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C
Web Technologies: React, Next.js, HTML5, CSS3, Tailwind CSS
Backend Development: Node.js, Express.js, Flask
Machine Learning: TensorFlow, PyTorch, Scikit-learn
Databases: MySQL, SQLite
Tools: Git, Linux, NGINX, Postman

EXPERIENCE

Secretary — Coding Club 2025–Present
Maharaja Institute of Technology, Mysore

- Organized **12+ technical workshops, hackathons, and developer events** for a community of **250+ students**.
- Mentored student teams on software projects covering web development, machine learning, and collaborative version control.
- Coordinated technical sessions introducing modern development practices and emerging technologies.

PROJECTS

Krishi Sarathi AI Platform Python, TensorFlow, YOLOv8

- Engineered agricultural advisory platform leveraging computer vision for automated crop disease identification.
- Trained **EfficientNet-B0** on **32,000+ crop images** achieving **90.7% classification accuracy**.
- Deployed **YOLOv8-based wildlife intrusion detection** delivering real-time crop protection alerts.

MaaSakhi — AI Maternal Health Assistant TensorFlow, Flask

- Built AI-assisted healthcare platform predicting **gestational diabetes risk** using clinical indicators.
- Developed neural-network model using the **Pima Indians Diabetes dataset** for medical risk prediction.
- Integrated **Gemini AI with contextual health retrieval** to generate personalized pregnancy guidance.

Real-Time Auction Management System Next.js, React, TypeScript

- Developed live sports auction platform supporting team-based player bidding and purse management.
- Successfully deployed during **Mahadasara 2025 at MIT Mysore** enabling auctions for **2500+ students**.
- Implemented server-side persistence and automated bid documentation for reliable auction operations.

Digital Forensic Investigation Tool Python, Flask

- Developed digital forensic platform enabling automated investigation of uploaded evidence files.
- Implemented **SHA-256/512 hashing, metadata extraction, and Shannon entropy analysis** for anomaly detection.
- Designed structured workflow (`/collect → /preserve → /analyze → /report`) generating investigation reports.

CERTIFICATIONS

- Artificial Intelligence Fundamentals — IBM SkillBuild
- Developing Front-End Apps with React — IBM / Coursera
- AWS Cloud Essentials — IBM / Coursera

ACHIEVEMENTS

- Hackathon Finalist — BIT 2025 (Top 8 / 900 teams)
- 2nd Place — Teckshetra Hackathon 2025
- 5th Place — Bahubali College Hackathon 2024
